

Plant Operator Seawater Desalination – St. Thomas USVI

Seven Seas Water is searching for self-motivated individuals to join a small team operating and maintaining reverse osmosis seawater desalination water plants on St. Thomas USVI. Strong preference given to candidates with experience in electrical, piping, or mechanical disciplines. Experience in Reverse Osmosis or other industrial process operations is desirable however applicants can have gained valuable experience in any number of environments including repair or maintenance in facilities, vehicles, military, or marine environments.

Responsibilities include data collection and record keeping, equipment and facilities maintenance including corrosion control, painting, and assistance with other daily plant operation duties. Working hours are typically 8am and 5pm Monday through Friday; however, availability on nights and weekends is frequently required.

In compliance with US federal law, all persons hired will be required to verify identity and eligibility to work in the United States and to complete the required employment eligibility verification form upon hire. Applicants must pass a pre-employment background check and drug screen before being hired.

Interested candidates should submit resumes to jobs@7seaswater.com.
